Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 7/3182002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Specification

1. The Domestic Priority data as claimed by Applicant has been corrected as -- PCT/JP00/005863--.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors. For example:

In claim 1, line 1, the Examiner suggests to delete "characterized by", and "which" in line 4 lacks sort of proper antecedent basis.

In claim 1, line 4, the Examiner suggests to delete "for applying to an article".

In claim 3, line 3, it is not clear to the Examiner whether the "support sheet" is the same as the "circuit substrate" in claim 1, and "adhesive layer" in line 2 is clearly not the structure referred to in the remaining lines of the claim.

In claim 4, line 2, and claim 6, line 5, the term "contactless" is vague and indefinite, and the remainder of the claim structure is simply not understood.

Multiple dependent claim 5 (and also claim 6) is dependent upon a multiple dependent claim (claim 4).

In claim 5, line 3, the Examiner suggests change "a reverse side" to --on the reverse side--.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicants' admission in view of Tanimura et al. (US 6065701).

Applicants appear to admit that an adhesive label containing a contact-less data carrier element mounted on one or both surfaces of a circuit substrate, with connecting through-hole in the latter case, is conventional and well known (Specification, pages 1-2, connecting paragraph). It is noted that the instant claimed invention covers the electronic components with a pressure sensitive layer (7), as illustrated in Figs 1-2. Tanimura's invention is directed to a label comprising electronic components (Abstract). In Fig. 2, Tanimura illustrates a label with the electronic components embedded in adhesive layers (15, 17) and attached to a substrate of reinforcing material (14), with

additional adhesive layer (13) and a surface layer of a coated paper (12) on the opposite side of the substrate. As such, it would have been obvious to one of ordinary skill in the art to modify the applicants' admitted conventional electronic containing label with Tanimura's teaching to embed the electronic components in an adhesive layer, motivated by the desire to form a durable integral label assembly.
